Aspiring software developer with 6 months experience using JavaScript. Currently, in the process of solidifying my knowledge of React. I have created a variety of projects that span from simple HTML/CSS mock-ups to more in-depth JavaScript projects. I am highly self-motivated, task-oriented, and thrive in collaborative environments.

PROJECTS

Social Media — *Node.js, JavaScript, REST API*
Node.js project that takes information from a mock social media REST API and returns post data.

ECommerce Storefront — *JavaScript, HTML, CSS*
Storefront that allows users to navigate a carousel of different items for sale, add them to their cart, remove them, and checkout.

Weather App — *JavaScript, REST API, HTML, CSS*
An app that utilizes a weather REST API to give the weather for various locations.

Daily Homepage—*JavaScript, REST API, HTML, CSS*
An inspirational homepage that allows the user to see a quote of the day, the current weather, add goals for the day, and flip through cute puppy pictures.

To-do List —*JavaScript, HTML, CSS*
A to-do list that allows users to add items to complete, allows users to delete items, and mark them as complete.

EXPERIENCE

OK Coders Bootcamp
2022 - PRESENT

- Created multiple front end projects using JavaScript, Bootstrap, HTML, CSS, and React.
- Collaborated with teammates to create projects and help each other with various coding issues.
- Contributed to modifying and critiquing peer's code, and allowing the same to be done for my code.
- Working with senior developers to better understand software development.

8th Grade English Teacher, Bethany Middle & Mayfield Middle
2020 - 2022

- Created lesson plans for the eighth grade English department.
- Collaborated with peers and other departments to ensure scaffolded lesson plans.
- Communicated effectively with peers, parents, and students.
- Gained a greater threshold of patience.

EDUCATION

University of Central Oklahoma— *Bachelor of Arts in English, Ed.*
2016 - 2020
